Summary

Developing working knowledge of both front-end and back-end requirements, delivering high-quality code, and troubleshooting technical issues are some of the key tasks. I have a strong focus on problem-solving and taking ownership to ensure successful project completion.

Experience

Full Stack Developer • Numeric Infosystem software Training Program **Aug 2022 - Present**

- Onboarded and familiarized with company's development environment, tools, and coding standards
 - Contributed to coding tasks, bug fixes, and feature implementations as part of a team, following established development processes
 - Gained experience in using company's preferred technologies, frameworks and libraries
 - Received feedback on code through code reviews from experienced team members, incorporating feedback to improve coding practices
-

Education

Bachelor of Technology - BTech • IPS College of Technology & Management **Jan 2020 - Present**

Computer Science Engineering • Grade: 7.91

I achieved 81.8% and 77.8% respectively for my 10th and 12th class from the MP board. Subsequently, I am pursuing a B-Tech in Computer Science, which I am due to finish by 2024. My academic background is rooted in Gwalior.
